audit, create or improve
processes to **turn off the
DRIP.****

Drip Data is a registered software company in the Republic of South Africa, turning the data you already have into actionable insights.

Three ways we turn off the DRIP

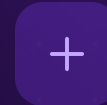

01

Audit

We review your existing processes and data to find where information is leaking.

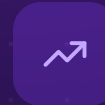

02

Create

We build new software and processes where none exist today.

03

Improve

We strengthen and connect the systems you already rely on.
